

Private view invitation

The art of visual perception

Mariano Molina – Rodrigo Quian Quiroga

Wednesday 4 – Friday 27 January 2012

Opening event – all welcome

Thursday 12 January 2012 6pm – 8pm

How do we see and perceive the external world? What processes in our brain makes us enjoy a landscape or a piece of art in a museum?

The art of visual perception is the result of collaboration, funded by the AHRC Beyond Text programme, between visual artist Mariano Molina and neuroscientist Rodrigo Quian Quiroga, showing principles of visual perception embedded into art creations.

Includes an 'in conversation' by Rodrigo Quian Quiroga at 6.15pm. Please contact Embrace Arts in advance to reserve your place.

For more information see:
